

# NavAQ

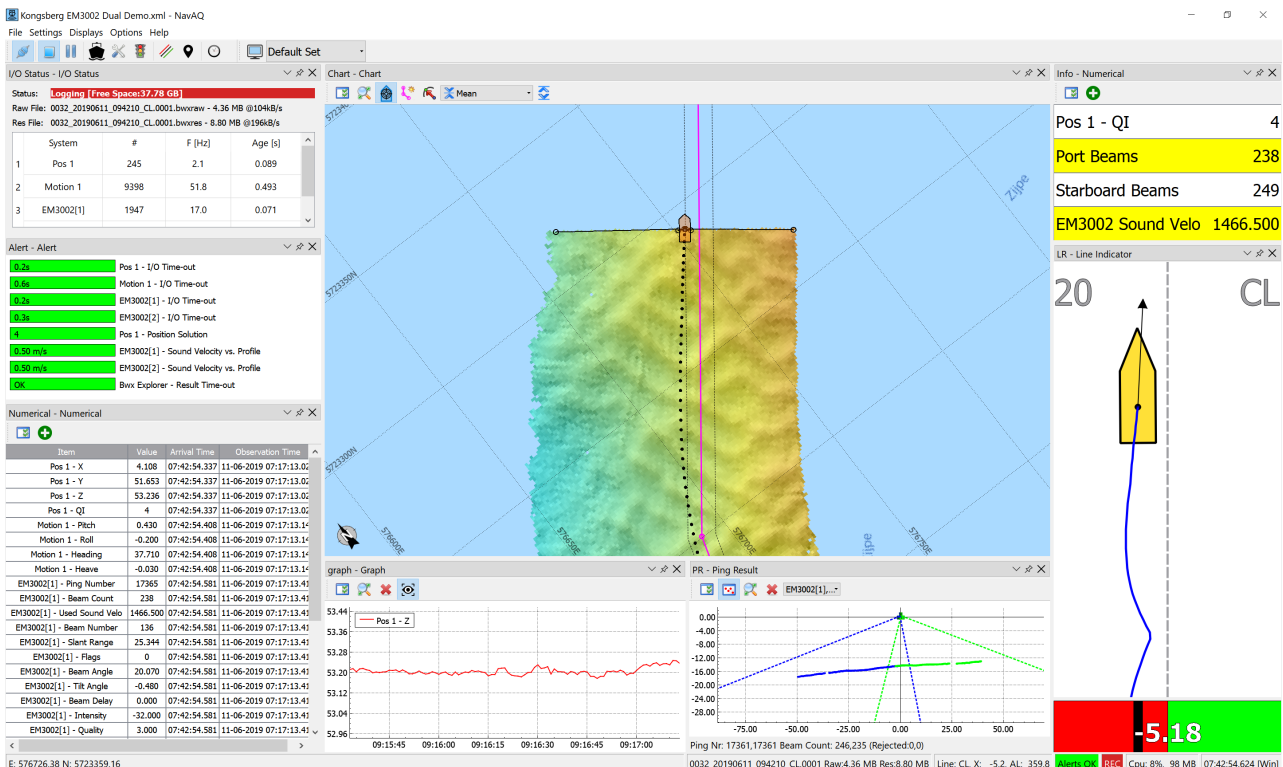

Easy Echosounder Data Acquisition!

NavAQ is a user-friendly navigation and data acquisition program for Single Beam and Multi Beam Echosounders. Positioning and Bathymetry results are computed in real-time, and visualized in various displays. All Raw sensor data is logged for further processing. Seamless integration with AutoClean and Auto-Patch.

The raw and result data are presented in various user-definable displays including Single Beam Echogram, Chart View with grid and backgrounds, Graphical, Numerical, IO Status, Alerts, and Left/Right Indicator for planned line.

A full range of equipment drivers is available:

- Multibeam: Kongberg, Teledyne Reson, R2Sonic, Norbit, WASSP, Picotech.
- Laser Scanner: Velodyne, Sick.
- Motion: Ixsea, SBG, Applanix, Kongberg, NMEA.
- Single Beam: Kongberg, Odom Teledyne, CEESCOPE, NMEA.
- NMEA position and Generic user defined data.
